

GA Valves Sales Limited Coronavirus Action

To Our Customers/Colleagues/Suppliers,

We are following closely the advice from Government, Public Health England and Public Health Scotland. To closely monitor the evolving situation with the Coronavirus (COVID-19).

<https://www.gov.uk/government/collections/coronavirus-covid-19-list-of-guidance>

The following Plans/Procedures have now been implemented.

Our Staff

All GA Valves employees have been screened for recent travel (last 14 days or more) to any countries outside of the UK.

- Sanitisation gels are available on entry/exit/throughout our site for the controlled use of all employees and restricted visitors.
- Social distancing throughout our site for all employees and restricted visitors.
- Remote desktops have been set up to enable home working for all administrative workers.
- Our Warehouse continues to function as usual, with the necessary precautionary measures to ensure deliveries are met.

Our Customers

Daily interactions with our customers take place at our customer sites. Our driver is equipped with mobile sanitisation gel. Where customers require additional site-specific requirements of protective clothing, cleaning specifics or customer protocols, GA will look to accommodate.

Our Suppliers

Daily interactions with suppliers will be restricted on deliveries to our premises. Interaction will be restricted to our goods in/goods out person who will for the interim period refrain from signing any documentation/handheld device etc, they will follow sanitisation protocol – hands are washed followed by the application of hand sanitiser. At all times supporting social distancing minimalising personal contact.

Our mission is to continue to be available to you, now and when you need us.

GA will continually monitor and assess the latest advice from all public health sources and if necessary, modify prevention activities according to any additional risk identified. We will communicate relevant changes to the current processes in this evolving situation.
